

CHECK BEFORE YOU DIG!

Soil Management and the Carousel Community Cleanup

Dear Carousel residents:

Thank you for your patience and cooperation as the cleanup in your neighborhood progresses.

The need for construction, maintenance or repairs around your home may arise before or after the cleanup reaches your cluster of homes. The soil management plan that was approved as part of the overall cleanup plan for the Carousel Tract requires the responsible parties to coordinate with each property owner or utility service provider to monitor, manage and handle residual soil during all excavation activities, which includes a homeowner's own projects or repairs, such as sewer repairs.

The Los Angeles Regional Water Quality Control Board (Regional Board) asks that you please follow these two important steps before and during projects or repairs at your home which involve digging or removing soil:

- **Call 811** before digging for any project around or under your home to coordinate with the City of Carson and utility service providers in your local area.
- **Contact Shell's 24-hour hotline at (310) 857-2335**, or visit the Shell house at 24628 Marbella Avenue, Monday-Friday, 8:00 a.m. to 4:00 p.m. Shell's contractors (AECOM) will remove impacted soil, replace it with clean soil, and mitigate any vapors, odor, and dust associated with the excavation.
